

Instructions for Authors

EFFECTIVE MAY 2026

Scope

Open Philosophy *Philosophy* is an international Open Access, peer-reviewed academic journal covering all areas of philosophy. The objective of *Open Philosophy* is to foster free exchange of ideas and provide an appropriate platform for presenting, discussing and disseminating new concepts, current trends, theoretical developments and research findings related to the broadest philosophical spectrum. The journal does not favour any particular philosophical school, perspective or methodology.

Editorial Policy

Unpublished Material

Submission of a manuscript implies that the work described is not copyrighted, published or submitted elsewhere, except in abstract form. The corresponding author should ensure that all authors approve the manuscript before its submission.

Conflict of interest

When authors submit a manuscript, they are responsible for recognizing and disclosing financial and/or other conflicts of interest that might bias their work and/or could inappropriately influence his/her judgment. If no specified acknowledgement is given, the Editors assume that no conflict of interest exists.

Copyright

All authors retain copyright, unless – due to their local circumstances – their work is not copyrighted. The use of each article will be governed by the [Creative Commons Attribution 4.0 International \(CC BY 4.0\) license](#). The corresponding author grants De Gruyter the license to use of the article, by signing the [License to Publish](#). A scanned copy of the duly signed license must be submitted along with the manuscript.

Authorship

Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported study. All those who have made significant contributions should be listed as co-authors. Where there are others who have participated in certain substantive aspects of the research project, they should be named in an Acknowledgement section. For more details on the role of authors, please see: <https://www.degruyterbrill.com/publishing/for-authors/author-policies/authorship-policy>.

One of the authors should be designated as the corresponding author to whom inquiries regarding the paper should be directed. It is the corresponding author's responsibility to ensure that the list of authors is accurate and complete. All the authors must be listed in the submission form in the Editorial Manager system, in the manuscript, and in the cover letter. The corresponding author is responsible for informing the coauthors of the manuscript status throughout the submission, review, and production process. Please note that a change in authorship (order of listing, addition or deletion of a name, or corresponding author designation) after submission of the manuscript will be implemented only after receipt of signed statements of agreement from all parties involved.

Data Sharing Policy

Effective December 2020, the journal requires authors to follow data sharing policy. Research data should be made widely available to the research community in order to demonstrate the robustness and validity of the

research presented in the journal, to encourage replication of the results, and to provide the community with opportunities to learn. By publishing in the journal authors are encouraged to provide a data availability statement (DAS) in their articles. Authors are encouraged to share their data but not required to. The decision to publish will not be affected by whether or not authors share their research data. See our [Data Sharing Policy](#) for more details.

Peer Review Process

The Editors reserve the right to decline the submitted manuscript without review, if the studies reported are not sufficiently novel or important to merit publication in the journal. Manuscripts deemed unsuitable (insufficient originality or of limited interest to the target audience) are returned to the author(s) without review. The Editor seeks advice from experts in the appropriate field. Research articles and communications are refereed by a minimum of two reviewers, review papers by at least three. The journal uses single-blind peer review model. Authors are requested to suggest persons competent to review their manuscript. However, please note that this will be treated only as a suggestion, and the final selection of reviewers is exclusively the Editor's decision. The final decision of acceptance is made by the Editor-in-Chief.

Scientific Misconduct

This journal publishes only original manuscripts that are not also published or going to be published elsewhere. Multiple submissions/publications, or redundant publications (re-packaging in different words of data already published by the same authors) will be rejected. If they are detected only after publication, the journal reserves the right to publish a Retraction Note. In each particular case Editors will follow [COPE's Core Practices](#) and implement its advice.

Criteria for Publication

The primary criteria for judging the acceptability of a manuscript are: its originality, scientific importance and interest to a general prehistory audience. See our [Editorial Policy](#) for more details.

Electronic Submission

Open Philosophy encourages the submission of both substantial full-length bodies of work and shorter manuscripts that report novel findings. There are no specific length restrictions for the overall manuscript or individual sections; however, we urge the authors to present and discuss their findings in a concise and accessible manner. All submitted manuscripts must be written in English language.

Manuscripts submitted under multiple authorship are reviewed on the assumption that all listed authors concur in the submission and are responsible for its content; they must have agreed to its publication and have given the corresponding author the authority to act on their behalf in all matters pertaining to publication. All the authors must be listed in the submission form in the Editorial Manager system, in the manuscript, and in the cover letter

All submissions must be made via the online submission system Editorial Manager (<http://www.editorialmanager.com/opphil>). In case of problems, please contact Kumaran Rengaswamy, the Assistant Managing Editor of this journal (assistant.managing.editor@degruyterbrill.com).

Publication Formats

Open Philosophy considers submissions of:

- Research Article – The default format for reporting research results. There is no length restriction.

Electronic Formats Allowed

We accept submission of text, tables and figures as separate files or as a composite file. For your initial submission, we recommend you upload your entire manuscript, including tables and figures, as a single PDF file. If you are invited to submit a revised manuscript, please provide us with individual files: an editable text and publication-quality figures.

- Text files can be submitted in the following formats:
 - MS Word – standard DOCUMENT (.DOC)
 - RICH TEXT FORMAT (.RTF)
 - PDF (**not applicable for re-submitted or accepted manuscripts**, see below).
- Tables should be submitted as MS Word or PDF (**not applicable for re-submitted or accepted manuscripts**, see below). Please note that a straight **Excel file is not an acceptable format**.
- Graphics files can be submitted in any of the following graphic formats: EPS; BMP; JPG; TIFF; GIF or PDF. Preferred resolution 600dpi, minimum 300dpi. Please note that **Powerpoint files are not accepted**.

Post-acceptance, text files of the revised manuscript and tables are required for use in the production. Authors should clearly indicate the location(s) of tables and figures in the text if these elements are given separately or at the end of the manuscript. If this information is not provided to the editorial office, we will assume that they should be left at the end of the text.

First-Time Submission of Manuscripts

It is important that authors include a **cover letter** with their manuscript. Please explain why you consider your manuscript to be suitable for publication in *Open Philosophy*, why your paper will inspire the other members of your field, and how will it drive academic discussion forward. Please use the 'comments' section to this aim.

The letter should contain all important details such as:

- your full name (submitted by)
- full title of article and short title
- full list of authors with affiliations
- e-mail of the corresponding author
- contact address, telephone/fax numbers of the corresponding author
- number of attached files, if there is more than one
- status: new, reviewed or accepted (with reference ID if reviewed or accepted)

The cover letter should explicitly state that the manuscript (or one with substantially the same content, by any of the authors) has not been previously published in any language anywhere and that it is not under simultaneous consideration or in press by another journal. If related work has been submitted, then we may require a preprint to be made available. Reviewers will be asked to comment on the overlap between the related submissions. Manuscripts that have been previously rejected or withdrawn after being returned for modification may be resubmitted if the major criticisms have been addressed. The cover letter must state that the manuscript is a resubmission, and the former manuscript number should be provided. To ensure fair and objective decision-making, authors must declare any associations that pose a conflict of interest in connection with evaluated manuscripts (see [Editorial Policy](#) for details).

Submission of Revised Articles

Resubmitted manuscripts should be accompanied by a letter outlining a point-by-point response to the Editor's and reviewers' comments and detailing the changes made to the manuscript. All changes in the text should be highlighted. A copy of the original manuscript should be included for comparison if the Editor requests one. If it is the first revision, authors need to return the revised manuscript within 28 days; if it is the second revision, authors need to return the revised manuscript within 14 days. Additional time for resubmission must be requested in advance. If the above-mentioned deadlines are not met, the manuscript will be treated as a new submission.

For resubmitted manuscripts, please provide us with **editable text and publication-quality figures**. Tables also need to be included within the editable article file or be submitted separately as editable files. Supply any figures as separate high-resolution, print-ready digital versions.

In addition to the editorial remarks, authors are asked to ensure that they have prepared the revised version according to the Journal's style.

Please note that the signed [License to Publish](https://www.degruyterbrill.com/publication/journal_key/OPPHIL/downloadAsset/OPPHIL_LICENSE%20TO%20PUBLISH.pdf) is required at this stage. You can find the form at https://www.degruyterbrill.com/publication/journal_key/OPPHIL/downloadAsset/OPPHIL_LICENSE%20TO%20PUBLISH.pdf

Organization of the Manuscript

We draw particular attention to the importance of carefully preparing the title, keywords and abstract, as these elements are indicators of the manuscript content in bibliographic databases and search engines.

General rules

The work must demonstrate its novelty, importance to the field, and its interest to scientific audiences in general. Conclusions must be justified by the study; please make your argumentation complete and be self-critical as you review your drafts.

The journal encourages the submission of both substantial full-length bodies of work and shorter manuscripts that report novel findings that might be based on a more limited range of data. There are no specific length restrictions for the overall manuscript or individual sections; however, we urge the authors to present and discuss their findings in a concise and accessible manner.

Articles should be organized into the following sections:

- Title (and running title)
- Name(s) of author(s), affiliation(s), personal e-mail address(es)
- Abstract
- Keywords
- Introduction
- Body of the work (including: methods, results, discussion if needed)
- Abbreviations
- Author's Statements and acknowledgements (must be submitted in a dedicated template and **not** included in the manuscript!)
- References
- Figure Legends and Table Captions
- Tables
- Figures
- Supplemental data (if applicable)

Each of these elements is detailed below. We draw particular attention to the importance of carefully preparing the title, keywords and abstract, as these elements are indicators of the manuscript content in bibliographic databases and search engines.

Title

We suggest the title should be informative, specific to the project, yet concise. Please bear in mind that a title that is comprehensible to a broad academic audience and readers outside your field will attract a wider readership. Avoid specialist abbreviations and non-standard acronyms. Titles should be presented in title case (capitalize all "major" words (nouns, verbs, adjectives, adverbs, and pronouns) in the title/heading, including

the second part of hyphenated major words (e.g., Self-Report not Self-report), and all words of four letters or more).

Authors, Affiliations, Addresses

In the cover letter, provide the first names (or initials – if used), middle names (or initials – if used), and surnames for all authors. Affiliations should include:

- Department, University or organization, City, Postal code, State/province (if applicable), Country.

One of the authors should be designated as the corresponding author to whom inquiries regarding the paper should be directed. It is the corresponding author's responsibility to ensure that the author list and the summary of the author contributions to the study are accurate and complete.

Abstract

The abstract should not exceed 200 words. The abstract should give a summary of the content of the paper. Mention the main findings without going into methodological detail and summarize briefly the most important items of the paper. Because the abstract will be published separately by abstracting services, it must be complete and understandable without reference to the text.

Keywords

List keywords for the work presented (maximum of 10), separated by commas. We suggest that keywords do not replicate those used in the title.

Abbreviations

Please use standard abbreviations. Ensure consistency of abbreviations throughout the article. Non-standard abbreviations should not be used unless they appear at least three times in the text. List all abbreviations, acronyms and symbols in alphabetical order, along with their expanded form, at the end of the text. Define them as well upon first use in the text.

Acknowledgments

This section should describe recognition of personal assistance: people who contributed to the work, but do not fit the criteria for authors should be listed along with their contributions. You must ensure that anyone named in the acknowledgments agrees to being so named. Information concerning research grant support should appear in a separate **Funding Information** section, not in an acknowledgements. Please include acknowledgements along with author's statements in the [Ethical and Legal Declarations template](#).

Author's Statements

Please complete the [Ethical and Legal Declarations template](#) (DOC) and submit it with your manuscript. **Please DO NOT include these statements in your manuscript.** The Ethical and Legal Declarations file will be available to reviewers and editors during the peer-review process. Statements will be included with the published article in the form in which they were submitted.

- **Research ethics** (if applicable; if not applicable, please enter "Not applicable")
Example: *The conducted research is not related to either human or animals use.*
- **Informed consent** (if applicable; if not applicable, please enter "Not applicable")
Example: *Informed consent has been obtained from all individuals included in this study.*
- **Author contributions** (mandatory);
Example:

For multi-authored publications: *All authors have accepted responsibility for the entire content of this manuscript and consented to its submission to the journal, reviewed all the results and approved the final version of the manuscript. IGH and JB designed the experiments and CC carried them out. HD developed the model code and performed the simulations. AA prepared the manuscript with*

contributions from all co-authors.

Or

For single-authored publications: *The author confirms the sole responsibility for the conception of the study, presented results and manuscript preparation.*

- **Use of large language models, AI and machine learning tools** (if applicable; if not applicable, please enter “None declared”);
- **Conflict of interest** (mandatory);

Example:

Author N.N. is a member of Committee XXXX. Author N.N. owns shares of Company Y mentioned in the article.

If there are no conflicts of interest, the following Author’s Statement should be included:

Authors state no conflict of interest.

- **Research funding** including the role of the study sponsor(s), if any, in study design, collection, analysis, and interpretation of data, writing the paper and decision to submit it for publication; If not applicable please enter: *Authors state no funding involved.*
- **Data availability statement** (recommended). Data availability statements can take one of the following forms (or a combination of more than one if required for multiple types of research data):
 - *The datasets generated during and/or analysed during the current study are available in the [NAME] repository, [PERSISTENT WEB LINK TO DATASETS].*
 - *The datasets generated during and/or analysed during the current study are available from the corresponding author on reasonable request.*
 - *Data sharing is not applicable to this article as no datasets were generated or analysed during the current study.*
 - *All data generated or analysed during this study are included in this published article [and its supplementary information files].*
 - *The data that support the findings of this study are available from [third party name] but restrictions apply to the availability of these data, which were used under license for the current study, and so are not publicly available. Data are however available from the authors upon reasonable request and with permission of [third party name].*

*Reference list entries in alphabetical order***Supplemental Material**

We encourage authors to submit essential supplementary files that additionally support the authors' conclusions along with their manuscripts (the principal conclusions should be fully supported without referral to the supplemental material). Supplemental material will always remain associated with its article and is not subject to any modifications after publication. The decision to publish the material with the article if it is accepted will be made by the Editor. Supporting files of no more than 10 MB in may be submitted in a variety of formats, but should be publication-ready, as these files will be published exactly as supplied. Material must be restricted to large or complex data sets or results that cannot be readily displayed because of space or technical limitations. Material that has been published previously is not acceptable for posting as supplemental material.

Supporting files should fall into one of the following categories:

- Dataset
- Additional Figure or Table
- Text
- Protocol
- Multimedia -Audio/Video/Animations (AVI, MPEG, WAV, Quicktime, animated GIF or Flash)

If the software required for users to view/use the supplemental material is not embedded in the file, you are Arged to use shareware or generally available/easily accessible programs. To prevent any misunderstandings, we request that authors submit a text file (instruction.txt) containing a brief instruction on how to use the files supplied. All supporting information should be referred to in the manuscript, with titles (and, if desired, legends) for all files listed under the heading 'Supporting Information'.

Outline of the Production Process

Once an article has been accepted for publication, the manuscript files are transferred into our production system to be formatted. Technical editors reserve the privilege of editing manuscripts to conform to the stylistic conventions of the journal. Once the article has been typeset, PDF proofs are generated so that authors can approve all editing and layout.

Electronic Proofs

Proofreading should be carried out once a final draft has been produced. Since the proofreading stage is the last opportunity to correct the article to be published, the authors are requested to make every effort to check for errors in their proofs before the paper is posted online. Please note that only essential changes can be made at this stage and extensive corrections, additions, or deletions will not be allowed. Limit changes to correction of

spelling errors, incorrect data, grammatical errors, and updated information for references to articles that have been submitted or are in press. If URLs have been provided in the article, recheck the sites to ensure that the addresses are still accurate and the material that you expect the reader to find is indeed there. Important new information that has become available between acceptance of the manuscript and receipt of the proofs may be inserted into the proof with the permission of the editor. Additionally, authors may be asked to address remarks and queries from the language and/or technical editors. Queries are written only to request necessary information or clarification of an unclear passage or to draw attention to edits that may have altered the sense. Please note that technical editors do not query at every instance where a change has been made. It is the author's responsibility to read the entire text, tables, and figure legends, not just items queried. Major alterations made will always be submitted to the authors for approval.

Manuscripts submitted under multiple authorship are published on the assumption that the final version of the manuscript has been seen and approved by all authors. The Corresponding Author will receive an email notification from noreply@digicorepro.io when a proof article is available and should submit comments containing all changes that should be introduced within the requested timeframe.

Immediate Publication

Manuscripts ready for publication are promptly posted online. The manuscripts are considered to be ready for publication when the final proofreading has been performed by authors, and all concerns have been resolved. Authors should notice that no changes can be made to the articles after online publication.
